

25 April 1958

MEMORANDUM FOR: Project Director

THROUGH: Project Contract Officer

THROUGH: Project R & D Officer

SUBJECT: New Photo Processing Technique

1. From Navy sources it has just come to our attention that an [] Photo Processing technique has been achieved by []

STAT
STAT

2. According to the information received this process represents something of a scientific breakthrough. The [] organization claims it can deliver 50x enlargements using this technique without perceptable degradation. Navy sources were forced to agree with the claim. The processing technique is under commercial security protection but the company was willing to talk to the Navy in terms of licensing the processing technique.

STAT

3. It is our intention to send [] with pieces of unclassified film to see what their process can deliver from it. The results of course will be reported to you. If you would like to send someone to review the process with us we would be happy to coordinate schedules.
